SUMMARY

Junior full-stack developer with 5 live full-stack apps, each built and deployed independently. My projects focus on what makes software reliable: three-layer validation, automated tests in CI, OAuth/JWT auth and OWASP-aware security. I also shipped a paid AI Chrome extension with 30+ users. Looking for my first junior full-stack or front-end role.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL
Frontend: React, Redux Toolkit, RTK Query, Tailwind CSS, shadcn/ui, Vite
Backend: Node.js, Express, Prisma, Passport.js (OAuth 2.0, JWT), Socket.IO, REST APIs, zod
Databases: PostgreSQL, Redis, BigQuery
Testing & DevOps: Vitest, React Testing Library, Supertest, GitHub Actions CI, Docker, Google Cloud Run, Cloudflare Pages, Render, Supabase
Spoken languages: Polish (native), English (B2/C1)
AI: Gemini API (Vertex AI), embeddings and semantic similarity, LLM evals, Cursor AI, Claude Code

PROJECTS

AutoWydatki · car running-cost tracker — Live · GitHub

- Built and deployed solo, with a public demo account. Tracks multiple cars, petrol/LPG fill-ups, EV charging, itemised services, spending charts and insurance/inspection reminders.
- Validation runs in three layers (browser, zod on the server, PostgreSQL CHECK constraints). Money is stored as integer grosze to avoid floating-point errors.
- Security: JWT auth via Passport (email or Google), bcrypt, rate limiting, helmet, strict CORS, per-user data isolation verified by tests, mapped against the OWASP Top 10.
- Unit, API (Supertest on real PostgreSQL) and component tests run in GitHub Actions on every PR.

React 19, Redux Toolkit/RTK Query, Tailwind, shadcn/ui, Express 5, Prisma, PostgreSQL, Supabase, Cloudflare Pages, Render

FireFocus AI · AI focus Chrome extension — Live

- Shipped a paid product with 30+ users: during a timed session, Gemini judges each page, video or feed item against the chosen topic and blocks what is off-topic.
- Built with Cursor AI: I planned the architecture and reviewed the code while the agent built the extension, API, landing page, user dashboard and admin dashboard (usage and AI cost analytics).
- Added Google sign-in, Stripe subscriptions (trial, Basic, Pro) and a Postgres-backed AI usage budget.

Gemini API (Vertex AI), embeddings, LLM evals, BigQuery, React, TypeScript, Express, PostgreSQL, Stripe, Docker, Google Cloud Run

GitX · social platform for developers and recruiters — Live · GitHub

- Full-stack app inspired by X, LinkedIn and GitHub: posts, likes, comments, bookmarks, follows, groups, profiles and a recruiter candidate view.
- Designed the REST API and relational PostgreSQL schema (Prisma). Added GitHub OAuth 2.0 with Passport.js, with sessions stored in Redis.

React, Node.js, Express, PostgreSQL, Prisma, Redis, Passport.js

Messages CRUD · a small app built to production standards — Live · GitHub

- 44 Vitest + Supertest tests (~91% line coverage) cover boundary cases and every endpoint branch. CI runs typecheck, lint, tests and build on every push, with a protected main branch.
- Client and server validate input independently, with correct HTTP status codes, a CORS allow-list, body-size limits and an error handler that never leaks internals.

React 19, TypeScript, RTK Query, Express 5, Prisma 7, PostgreSQL, Docker Compose, GitHub Actions

WORK EXPERIENCE

Automotive Detailer, APZ GmbH, Rheine, Germany — Aug 2025 – Jan 2026

- Outsourced technician on site at a BMW/MINI dealership. Prepared about 4 vehicles a day to dealership standard, including paint correction and refurbishing lease returns.

Automotive Detailer, Karlskrona Bilcenter AB (Mazda/Suzuki dealership), Karlskrona, Sweden — May 2025 – Jul 2025

- Prepared vehicles for resale on 12-hour shifts, 6 days a week, working in English in an international team.

Warehouse Associate, Ambra S.A., Wola Duża, Poland — Jun 2024 – Mar 2025

- Assembled promotional display units under a quota-based system, meeting daily team output targets with consistent accuracy.

EDUCATION

The Odin Project, Full Stack JavaScript path — Feb 2026 – Sep 2026

- Completed the self-paced curriculum, which is built on reading documentation and building projects from scratch.

Regionalne Centrum Edukacji Zawodowej w Biłgoraju — 2019 – 2024

- Vocational diploma, Programmer Technician (qualification 351406, INF.03 and INF.04)
