

Damian Wujec

Junior Full Stack Developer (Node.js / React)

wujecd Damian12@gmail.com · +48 695 227 457 · Poland, Bilgoraj

[GitHub](#) · [Portfolio](#) · [LinkedIn](#)

Skills

Languages: HTML, CSS, JavaScript, TypeScript, SQL

Frameworks / Libraries: React, Node.js, Express, Prisma, Vite, Passport.js, Socket.IO

Databases: PostgreSQL, Redis

Concepts: REST API, Authentication, Authorization, Backend Development

DevOps / Tools: Git, ESLint, Vitest, React Testing Library, Cursor AI

Projects

GitX

Full-stack social platform for developers inspired by X (Twitter). Designed and implemented a RESTful API with authentication and authorization using GitHub OAuth 2.0 (Passport.js). Built core social features including posts, likes, comments, bookmarks, follow system, groups, and user profiles. Designed relational database schema and implemented backend session management using Redis.

Node.js, Express, PostgreSQL, Prisma, GitHub OAuth 2.0 (Passport.js), Redis (session store)

Education

Regionalne Centrum Edukacji Zawodowej w Bilgoraju

Vocational Diploma - Programmer Technician (Qualification 351406, INF.03 INF.04)

2019–2024

Experience

Automotive Detailer

APZ GmbH, Rheine, Germany | 2025

- Delivered high-volume automotive detailing (4 vehicles/day), including refurbishment of lease-return vehicles
- Performed paint correction, surface protection, and full interior/exterior restoration for dealership-ready standards
- Worked on-site at BMW/MINI dealership (Procar Automobile, Münster) as an outsourced technician

Automotive Detailer

Karlskrona Bilcenter AB (Authorized Mazda/Suzuki & Used Car Dealership), Karlskrona, Sweden | 2025

- Performed full-cycle vehicle detailing including paint correction, polishing, protective coatings, and interior restoration
- Prepared vehicles for resale by improving presentation quality to dealership standards
- Communicated in English within an international work environment while maintaining high productivity (12h shifts, 6 days/week)

Warehouse Associate

Ambra S.A., Wola Duża, Poland | 2024

- Assembled and prepared promotional display units in a high-paced warehouse environment under a performance-based (quota/akord) system
- Worked in team-based production workflows, ensuring timely delivery of daily output targets
- Maintained accuracy, consistency, and reliability while operating under time constraints
